ABOUT ME

I am a first-year college student in the Information Systems and Technology program at Jakarta State University.

I am a quick learner who enjoys challenges and thrives on collaboration with others. I have a deaf disability, specifically a hearing impairment (deaf disability), but I can hear with the help of hearing aids, and I can speak well.

My experience in graphic design, editing, photography, videography, and scriptwriting has equipped me with a diverse skill set. I also have an interest in self-development, communication, photography or videography, and graphic design.
